At the time of filming the video and making this handout for it, we could not find an Auslan sign for “Coronavirus” and only saw it as a finger spelt word. A new sign is now appearing in some Auslan resources. It is important to remember that Key Word Sign is generally used with people who can hear but have difficulty with spoken communication, while Auslan is the language of the Deaf community. For the purposes of our Coronavirus resources, we created a new gesture which is a combination of the letter “C” + “sick”. We also used a combination of “people” + “work” to mean “staff”.

We acknowledge the Deaf community for the use of Auslan signs.
