

*Experience  
the rewards  
of inclusive  
employment*

# Customised Employment

**We take the time to work with you, so you can work.**

Do you have employment goals in your NDIS plan or SLES funding?

Scope's Customised Employment approach is designed to build your confidence and give you more control so you can choose the right employment outcome for you.

## Customised Employment Process

### Discovery

We take time to discover your:

- interests
- strengths
- skills
- support needs
- social and support connections

### Job Search Planning

Using information from your Discovery, we:

- explore suitable jobs and careers
- visit businesses and gather information
- develop a resume or visual information that represents your skills and abilities

### Job Development and Negotiation

We work with you and potential employers to:

- discuss work experience and employment opportunities
- develop job roles that fit your skills and interests
- discuss your conditions of employment, such as job responsibilities, work hours, dress code, salary
- understand your support needs at work
- understand the employer support needs

### Post-employment Support

We work with you and your employer by:

- putting your workplace support plan into action
- helping you to have a good working relationship with your employer and co-workers
- assisting with career progression

*Ciaran's knowledge and keen interest in Manga has led him to look for employment opportunities at Minotaur.*

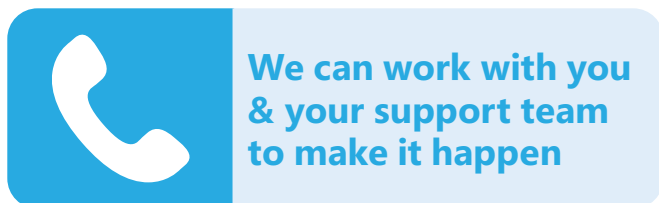

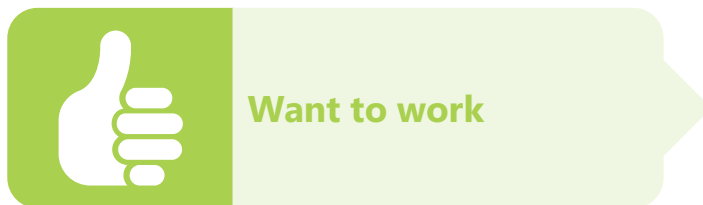

## Experience the rewards of inclusive employment

Certified Customised Employment Scouts take the time to understand you, your family and support situation. We help you to discover your career interests, strengths, skills, and support needs, and explore your best employment options.

We then work with inclusive employers to identify a role where your contribution is valued, and your support needs recognised, so you can enjoy the many benefits of working.

Backed by research and tried and tested in the United States for over 20 years, Customised Employment has proven to be a successful approach in assisting people with significant disability to participate in open employment.
